

LECTURERS

Dr. Brittney Ciszek | DDS, Ph.D.

Dr. Ciszek believes that the field of dentistry requires an eye for artistry and a passion for science and discovery. She practices evidence-based dentistry and utilizes the latest technology and materials to create and maintain happy, healthy smiles for her patients.

- Ph.D. — Oral Biology emphasis on Pain Neurobiology |University of North Carolina
- Doctor of Dental Surgery (DDS) — University of North Carolina

Dr. Rick Jackomis | DDS, JD

As a former practicing attorney, Dr. Jackomis is a dentist like no other. He has over 10 years of experience in placing implants while transitioning to exclusively guided surgeries nearly 5 years ago. Throughout his colorful career, Dr. Jackomis has been actively involved with the clinical use of lasers, CAD/CAM, and cone beam radiography.

- Dental education — Medical College of Virginia
- Legal credentials — Valparaiso University, Indiana

DIGITALLY- GUIDED COURSE FOR FULL-ARCH FIXED RESTORATIONS

You're comfortable placing implants and ready to become a master. The full arch course is a series of full arch fixed restorations that restore all teeth' function.

Discover how to leverage the benefits of digital diagnosis and treatment to streamline provisional and final prosthetics. The full arch system includes treatment planning, surgical guide design, multi-unit abutments, bone reduction guide, temporary cylinders, dentures, prostheses, dental model, final prosthesis, surgical report, and drilling protocol.

- Hands-on training — work directly on a specialized edentulous typodont.
- Clinical workflow — walk through a complete digital full arch case review and prosthetic delivery.
- Tooled for efficiency — chair time is cut in half with the surgical guide.

INCLUDES

- 8 CE Credits
- Lunch
- Hands-on training materials
- Typodont
- Certificate
- Doctor finder: listing as a **Certified DIONavi Provider.**
